-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 471, 431, 451, 31, 32, 35, and 41. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:

Page 9, line 16 "in the metallic shell 217" is objected to since 217 was previously used to describe the pins.

Page 11, line 11 "a window 30" is objected to since 30 was previously used to describe the feeler.

Appropriate correction is required.

Claim Objections

3. Claims 4 and 5 objected to because of the following informalities:

Claims 4 and 5 refer to “said demultiplying mechanism”, however, claim 1 does not define a “demultiplying mechanism, claim 1 defines a “force transmission mechanism.”

Appropriate correction is required.

Double Patenting

4. Claims 1-5, and 11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, and 10 of copending Application No. 10/760781. Although the conflicting claims are not identical, they are not patentably distinct from each other because the force transmission mechanism and the demultiplying mechanism perform the same function.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claim 11 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 15-18, 22, 23 of copending Application No. 10/761161. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to a touch-triggered probed comprising a first a second mobile element and a first and second resilient device.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

6. Claims 6-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. It should be noted that claims 1-11 would be allowable if the provisional obviousness-type double patenting rejections from paragraphs 4 and 5 above are overcome.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents disclose probes Nishimura et al. (U. S. Patent No. 5,756,886), Mies et al. (U. S. Patent No. 5,727,326), Hellier et al. (U. S. Patent No. 5,634,280), McMurtry et al. (U. S. Patent No. 5,339,535), Baxter (U. S. Patent No. 5,209,131), McMurtry et al. (U. S. Patent No. 5,101,548), McMurtry et al. (U. S. Patent No. 5,084,981), Cassani (U. S. Patent No. 4,859,817), Cusack (U. S. Patent No. 4,510,693), McMurtry (U. S. Patent No. 4,473,955), Werner et al. (U. S. Patent No. 4,177,568), McMurtry (U. S. Patent No. 4,168,576), and McMurtry (U. S. Patent No. 4,155,171).

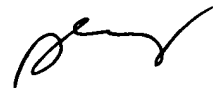

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy R Cohen whose telephone number is (571) 272-2238. The examiner can normally be reached on 8 am - 5 pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F. Gutierrez can be reached on (571) 272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
